Préface.

Le nom de *Beethoven* est un nom consacré dans l'art. Ses Symphonies sont universellement reconnues aujourd'hui comme des chefs-d'œuvre. Elles ne sauraient être trop meditées, trop étudiées par tous ceux qui ont un desir sérieux de savoir ou de produire. Toutes les façons de les répandre et de les populariser ont en conséquence leur dégré d'utilité, et les arrangemens pour Piano, faits en assez grand nombre jusqu'ici de ces symphonies, ne sont pas dépourvus d'un certain avantage, bien que considérés intrinsèquement ils soient pour la plupart de mediocre valeur. La plus mauvaise lithographie, la traduction la plus incorrecte donne encore une idée vague du génie des Michel-Ange et des Shakespeare. Dans la plus incomplète réduction on retrouve de loin en loin les traces demi-effacées de l'inspiration des maîtres. Mais l'extension acquise par le Piano en ces derniers temps, par suite des progrès de l'exécution et des perfectionnemens apportés dans le mécanisme, permettent de faire plus et mieux que ce qui a été fait jusqu'à cette heure. Par le développement indefini de sa puissance harmonique, le Piano tend de plus en plus à s'assimiler toutes les compositions orchestrales. Dans l'espace de ses sept octaves, il peut produire, à peu d'exception près, tous les traits, toutes les combinaisons, toutes les figures de la composition la plus savante, et ne laisse à l'orchestre d'autres superiorités (immenses il est vrai) que celles de la diversité des timbres et des effets des masses.

Vorwort.

Der Name *Beethoven* ist heilig in der Kunst. Seine Symphonieen werden heut zu Tage allgemein als Meisterwerke anerkannt; wer irgend den ernsten Wunsch hegt, sein Wissen zu erweitern oder selbst Neues zu schaffen, der kann diese Symphonieen nie genug durchdenken und studiren. Deshalb hat jede Art und Weise, sie zu verbreiten und allgemeiner zugänglich zu machen, ein gewisses Verdienst, und den bisherigen, ziemlich zahlreichen Bearbeitungen ist ein verhältnissmässiger Nutzen durchaus nicht abzusprechen, obwohl sie bei tieferem Eindringen meistens nur von geringem Werth erscheinen. Der schlechteste Steindruck, die fehlerhafteste Uebersetzung giebt doch immer noch ein, wenn auch unbestimmtes Bild von dem Genie eines Michel Angelo, eines Shakespeare; in dem unvollständigsten Klavierauszuge erkennt man dennoch hin und wieder die, wenn auch halb verwischten Spuren von der Begeisterung des Meisters. Indessen, durch die Ausdehnung, welche das Pianoforte in der neuesten Zeit zufolge der Fortschritte in der technischen Fertigkeit und in der mechanischen Verbesserung gewonnen hat, wird es jetzt möglich, Mehr und Besseres zu leisten, als bisher geleistet worden ist. Durch die unermessliche Entwickelung seiner harmonischen Gewalt sucht das Pianoforte sich immer mehr und mehr alle Orchester-Compositionen anzueignen. In dem Umfange seiner sieben Oktaven vermag es, mit wenigen Ausnahmen, alle Züge, alle Combinationen, alle Gestaltungen der gründlichsten und tiefsten Tonschöpfung wiederzugeben, und lässt dem Orchester keine anderen Vorzüge,

ZENEAKADÉMIA LISZT MÚZEUM

Tel a été mon but dans le travail que je publie aujourd'hui. J'eusse estimé, je l'avoue, comme un assez inutile emploi de mes heures la publication d'une vingtième variante des Symphonies dans la manière usitée jusqu'ici; mais je les regarderai comme bien remplies, si j'ai réussi à transporter sur le Piano, non seulement les grandes lignes de la Composition de Beethoven, mais encore cette multitude de détail et d'accessoire qui concourent si puissamment à la perfection de l'ensemble. Je serai satisfait si j'ai accompli la tâche du graveur intelligent, du traducteur consciencieux qui saisissent l'esprit d'une oeuvre avec la lettre, et contribuent ainsi a propager la connaissance des maîtres et le sentiment du beau.

Rome. 1865. F. Liszt.

als die Verschiedenheit der Klangfarben und die massenhaften Effekte—Vorzüge freilich, die ungeheuer sind.

In solcher Absicht habe ich die Arbeit, die ich der Welt jetzt übergebe, unternommen. Ich gestehe, dass ich es für eine ziemlich unnütze Verwendung meiner Zeit ansehen müsste, wenn ich weiter nichts gethan hätte, als die vielen bisherigen Ausgaben der Symphonieen mit einer neuen, in gewohnter Weise bearbeiteten vermehren; aber ich halte meine Zeit für gut angewendet, wenn es mir gelungen ist, nicht blos die grossen Umrisse der Beethovenschen Composition, sondern auch alle jene Feinheiten und kleineren Züge auf das Pianoforte zu übertragen, welche so bedeutend zur Vollendung des Ganzen mitwirken. Mein Ziel ist erreicht, wenn ich es dem verständigen Kupferstecher, dem gewissenhaften Uebersetzer gleichgethan habe, welche den Geist eines Werkes auffassen und so zur Erkenntniss der grossen Meister und zur Bildung des Sinnes für das Schöne beitragen.

Rom, 1865. F. Liszt.
