

Introduction to the Discography.

The disc recordings of the Liszt pupils were of course all issued originally on 78 rpm records since they were all recorded before the LP era. There are however a few recordings that, for one reason or another, were not issued at the time of recording and only later issued for the first time on LP or even CD as has been indicated in the discography.

The discography lists the first issue of the records by label and record number as well as the year of recording, when known. An R identifies piano-roll recordings before the recording year (sometimes that is not known). If a roll has not been transferred to a disc or cassette, so that it can be listened to, it is marked (not on a record). In the column Other issues are listed all versions of the original recording known to the author, be it on 78's, LP's or CD's, as of June 1999.
